1. The following is an examiner's statement of reasons for allowance: in view of the comments in the Appeal Brief examiner reexamined the motivation used in the combination. The result is that the rejections are being withdrawn not because of the voluminous comments of applicant in the Appeal Brief, but because the specific motivation that examiner relied upon from the van Rooijen reference also had a solution to it taught in the White and van Rooijen references. Specifically the van Rooijen reference was relied upon for its teaching that the type of sensors in the Parks and White references are known to suffer from temperature variation related problems which the secondary Shults, Eifler, Yasuda, Tien, Raymond, Wohltjen, Stanbro or Pribat references clearly addressed. However, van Rooijen teaches that these problems can be overcome by avoiding thermal instability in the system (see page 2233). In discussing the Tsuji patent (US 4,420,564) White also indicates that temperature problems can be overcome by temperature control. Thus there are two possibilities for solving the known problem and no clear advantage or reason to use the methods and apparatus taught by Shults, Eifler, Yasuda, Tien, Raymond, Wohltjen, Stanbro or Pribat in place of or in addition to the temperature control taught in White or van Rooijen.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Arlen Soderquist whose current telephone number is (571) 272-1265 as a result of the examiner moving to the new USPTO location.
